
ENVIRONMENTAL POLICY

Klaveness Footwear, SA is a company dedicated to the development and production of comfort and orthopedic footwear that is committed to developing its activity in the environmental area in a responsible manner, aiming to contribute to long-term sustainable development.

This Policy covers all activities directly or indirectly linked to the manufacture of our products and is based on the following commitments:

- Maintain the Environmental Management System (SGA) that allows for the systematization of practices and continuous improvement of environmental performance;
- Always maintain technically and economically viable practices of prevention, control and reduction of pollution, which enhance the protection of the environment,
- Comply with environmental compliance obligations (legal as well as other environmental obligations underwritten by the organization);
- Identify the environmental aspects of its activities and take measures to minimize their impacts, namely:
 - o Seek solutions to replace and eliminate the use of hazardous substances;
 - o Reduce and control the consumption and emission of solvents;
 - o Promote the rational use of energy, water and other natural resources;
 - o Optimize the use of solar energy to reduce the carbon footprint
 - o Reduce and control the production of waste and ensure its correct forwarding;
 - o Promote training and information on identified environmental aspects and make employees aware of the fulfillment of their obligations;

Prevent the occurrence of accidents or environmental damage and ensure an adequate operational response to emergency situations.

In order to contribute to their environmental awareness, we train our employees and encourage our customers, partners and suppliers to the principles by which we operate.
